**ALGAECIDE "300"**

**DIRECTIONS**

**ALGAECIDE 300** is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using **ALGAECIDE 300**.

**FOR POOLS HAVING JUST VISIBLE** algae growth, add an initial dose of 17 to 27 fl. oz. of **ALGAECIDE 300** per 10,000 gal. of water and remove settled algae debris by cleaning.

**FOR TREATMENT OF FRESHLY CLEANED AND FILLED POOLS**, add initially 9 to 17 fl. oz. of **ALGAECIDE 300** per 10,000 gal. of water.

**TO MAINTAIN POOLS** free of visible algae growth, subsequent additions of 3 to 6 fl. oz. of **ALGAECIDE 300** per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment. Uniform distribution of **ALGAECIDE 300** throughout the water in the pool is necessary for maximum effectiveness.

**ALGAECIDE 300** is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH.

**ALGAECIDE 300** can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix **ALGAECIDE 300** with concentrated dry or liquid chlorine products.

**HELPS KEEP POOL WATER CLEAR AND FREE OF GROWING ALGAE**
