Re: Amended Labeling
Your submission dated September 10, 1991

Your label is referred to above submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended. It is acceptable, provided that you make the label changes under the "Environmental Hazard" section of the label. Replace the statement "do not apply directly to water or wetlands" with the statement "do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark."

Also add the groundwater contamination statement, under the Environmental Hazard Section. "Most cases of groundwater contamination involving phenoxy herbicide such as 2,4-D have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D pesticides at such sites to prevent contamination of groundwater supplies."
