

34571-2

BETZ ENTEC 341

FUNGI CONTROL AGENT

WARNING—TOXIC

KEEP OUT OF REACH OF CHILDREN.
HARMFUL IF SWALLOWED. Keep material dry. If material gets wet, it may decompose, liberating toxic chlorine gas. Avoid inhalation. Causes skin irritation. Do not get into eyes, on skin or clothing. Wear rubber gloves, and goggles or face shield, when handling. In case of contact with skin, wash well with soap and water. In case of contact with eyes, flush promptly and thoroughly with water. In case of ingestion or contact with eyes or inhalation of chlorine gas, secure immediate medical attention.

Do not reuse empty container. Send to drum reconditioner, or destroy by perforating or crushing and bury in a safe place.

DIRECTIONS FOR USE

Betz Entec 341 aids in the control of fungi and bacteria in the water in brewery pasteurizers and in recirculating industrial water cooling towers.

In the case of brewery pasteurizers, this product should be used at a rate between 0.1 and 0.75 pound per thousand gallons of water per compartment.

In recirculating cooling-tower systems, use at a rate between 0.2 and 1.0 pound per thousand gallons of water contained in the system.

Begin treatment when the system is in jeopardy of becoming affected or after cleaning systems where efficiency is already impaired. Apply at a point in the system where the product will be uniformly mixed. Repeat treatment every day, or as needed. In the event the system is badly fouled, precleaning is recommended.

Measurement of the residual chlorine levels in the systems should be made on a periodic basis to insure a 0.2 to 0.5 part per million (ppm) residual minimum.

FOR INDUSTRIAL USE ONLY. Technical advice regarding specific site problems is available from BETZ Entec, Inc.

Contents: PELLETS

Active Ingredient	
1, 3-dichloro-5, 5-dimethylhydantoin	48%
Inert Ingredients*	52%
*Inert ingredients include solubilizing and dispersing agents.
