RESINGARD™

WATER SOFTENER SANITIZING FORMULA

EPA Registered Sanitizer

Laboratory tests have demonstrated that, when used in a potable water system, Diamond Crystal® Salt Nuggets with ResinGard™ sanitizing formula effectively inhibit the growth of bacteria in the softener brine tank and resin bed. This exclusive ResinGard™ sanitizing formula is registered with the United States Environmental Protection Agency.

Reduces Odors

The growth of bacteria and algae in your softener's brine tank can cause objectionable odors. Laboratory tests show that Diamond Crystal's ResinGard™ sanitizing formula destroys over 95% of accumulated microorganisms during the softener's regeneration cycle.

Cleans Out Dirt and Impurities

Dirt and impurities can prevent your softener from operating efficiently and can eventually shorten its usable life. Diamond Crystal ResinGard™ sanitizing formula contains three cleansing agents that effectively clean out dirt and impurities during your softener's regeneration cycle.

Restores Softener Capacity

Regular use of Diamond Crystal® Salt Nuggets with ResinGard™ sanitizing formula rinses away encrusted minerals from your softener's resin bed and helps restore its water softening capability. The cleaner the resin, the less salt required to regenerate it.

Made with Food Grade Salt

Diamond Crystal® Salt Nuggets with ResinGard™ sanitizing formula are made from food grade salt - 99.9% pure. No need to worry about insolubles such as bits of dirt, sand or coral that can accumulate as sludge in your brine tank.

Improved Mush Resistance

Diamond Crystal® Salt Nuggets with ResinGard™ sanitizing formula resist crumbling and breaking in brine better than regular pelletized salt. This helps your softener use the salt efficiently and reduces the chance of mushing and bridging problems.

CAUTION

Always wash hands after contact with this product. Do not use other cleansers in the brine tank. Always follow your softener manufacturer's instructions for salt and additive use. If you are currently using rock salt in your softener, be sure to clean out any sludge or other deposits from your brine tank before adding this product.

DISPOSAL: When bag is empty, place in suitable trash container.

Application of Amended Labeling
Received November 13, 1984

We are accepting this amendment as an administrative action in accordance with Section 162.9-1 for which no consideration of data is necessary. A stamped edited copy of the draft label is enclosed for your records.

To complete this action submit five copies of your finished printed labels as described in the A-79 enclosure. These labels must be submitted to the Agency before you release the product for shipment to comply with PR Notice 82-2 of June 18, 1982. Refer to Section 162.10 of Title 40 of the Code of Federal Regulations for general labeling requirements. Failure to comply with these requirements may result in rejection of your label.

Sincerely,

A. E. Castillo
