DATE OF ISSUANCE

30 1994

NOTICE OF PESTICIDE: REGISTRATION
 REREISTRATION
*(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)*

NAME OF PESTICIDE PRODUCT

OLYMPIC SWIM TABS

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

York Chemical Corp.
3309 East John W. Carpenter Freeway
Irving, TX 75062

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Revise the precautionary statements on your labeling in accordance with the enclosed Isocyanurate RED Attachment A.

2. Revise the Environmental Hazards statement to: "This pesticide is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA."

3. The ingredient statement must be revised by citing the nominal concentration of the active ingredient at 97% and indicating inert ingredient at 3%.

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. Causes eye damage-- wear goggles or face shield when handling. May be harmful or fatal if swallowed. May cause severe skin burns. Do not get in eyes, on skin or on clothing. Avoid breathing dust or fumes. Wash thoroughly after handling. Remove clothing if contaminated promptly and wash before reuse.

PRACTICAL TREATMENT (FIRST AID): In case of contact with liquid, flush eyes or skin with plenty of water for at least 15 minutes. If SWALLOWED, promptly drink one or two large glasses of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Contact with other materials may cause fire or explosion, or result in the formation of toxic or highly flammable gases. Contact with water or moist air liberates irritating and hazardous gases.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not treat animal or bird ponds. Do not discharge where it will drain into lakes, streams, rivers or public water. Do not contaminate water when disposing of equipment washwater. Apply this product only as specified on this label.

SPILL: Sweep up and dispose while providing adequate ventilation. Flush away with plenty of water.

IN CASE OF FIRE: Use water spray to cool containers exposed to heat. Do not use water to extinguish material. Noxious fumes can be formed. Avoid breathing dust or fumes and self-contained breathing apparatus.

NET WEIGHT: 25 lbs. (

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

AT TIME OF POOL OPENING:

1. Superchlorinate to satisfy initial chlorine demand of raw water. Use a suitable shock treatment by following its label directions carefully.
NOTE: Re-entry into treated swimming pool is prohibited above levels of 3 ppm of chlorine.
2. To increase chlorine efficiency, add Pool Stabilizer (Cyanuric Acid), as directed on the container label. This one time treatment helps diminish chlorine loss caused by the sun's ultraviolet rays.
3. Using a reliable test kit, check pH. If required adjust pH to 7.2 - 7.6 range using either pH Plus to raise pH, or pH Minus to lower pH.

REGULAR MAINTENANCE: The day following superchlorination, test chlorine level. When chlorine level drops below 2.0 ppm, add one Swim Tab for each 5,000 gallons of pool water directly to the skimmer basket or floating dispenser. **DO NOT DROP TABLETS DIRECTLY INTO POOL. BLEACHED LINERS, FADED PAINT OR DAMAGE TO CONCRETE FINISHES MAY RESULT.** When used as directed Swim Tabs will provide long lasting chlorine residual. Dosage may vary depending upon air temperature, bathing loads and water temperature. Test chlorine level frequently using a reliable test kit. Maintain chlorine residual at 1.0 to 2.0 ppm. Repeat dosage as needed.

SUPPLEMENTARY TREATMENT: Superchlorinate every 7 to 10 days during hot weather or heavy bathing loads. Follow directions on shock treatment used. Test pH frequently. Add pH Plus if pH goes below 7.2 or pH Minus if pH rises above 7.6.

STORAGE AND DISPOSAL

STORAGE INSTRUCTIONS: Store in original container and place in locked storage area. Keep from freezing. Do not contaminate water, food or feed by storage and disposal.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Rinse thoroughly before discarding in trash.

GENERAL: Consult Federal, state or local disposal authorities for approved alternative procedures such as limited burning.
