Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's instructions. Adjust pH to

between 7.2-7.6. Add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the radiative effects of sunlight upon the chlorine residual. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl pools when pucks are in skimmer. Initially add one of this product per 10,000 gallons of water. Add additional product as determined by test kit or test strips to maintain chlorine residual of 1-3 ppm.
