**DIRECTIONS FOR USE  
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CHEMGARD CL-1225 is used in industrial and/or commercial recirculating cooling tower systems and industrial air-washing systems to control microbiological slime. Prior to the use of CHEMGARD CL-1225 in industrial and/or commercial recirculating cooling tower systems, systems should be cleaned to remove algal growth, microbiological slimes, and other deposits. Then make an initial slug addition of 9.5 to 14.2 fl. oz. of CHEMGARD CL-1225 per 1000 gal. of water to provide 80 to 120 ppm of CHEMGARD CL-1225 based on total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug addition of 4.7 to 14.2 fl. oz. of CHEMGARD CL-1225 per 1000 gal. of water (40 to 120 ppm CHEMGARD CL-1225) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of recirculating cooling tower systems.

CHEMGARD CL-1225 is used in industrial air-washing systems which maintain effective mist-eliminating components. Prior to its use, systems should be cleaned to remove bacterial slime and other deposits. An initial slug dose of 22.2 to 28.4 fl. oz. of CHEMGARD CL-1225 per 1000 gal. of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 16.5 to 28.4 fl. oz. of CHEMGARD CL-1225 per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Slug additions may be made to the sump or the water collection trays of the airwash system.

**STORAGE AND DISPOSAL**

**PROHIBITIONS:** Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE DISPOSAL:** Pesticide spray mixture, or residue that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides, or buried in a safe place away from water supplies.

**CONTAINER DISPOSAL:**

- 1. METAL: Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in an approved landfill or bury in a safe place. Containers over 30 gallons should be resealed before offering for reconditioning.
- 2. PLASTIC: Containers under 30 gallons must not be reused but should be triple rinsed and disposed of in an incinerator or landfill approved for pesticide containers or buried in a safe place. Containers over 30 gallons are to be resealed and offered for reconditioning or triple rinsed (or equivalent) and offered for recycling, reconditioning, or disposal in an approved landfill or buried in a safe place.

**GENERAL:** Consult Federal, State, or Local disposal authorities for approved alternative procedures.
