Attention: Mr. Chad Mateer

Subject Bromethalin Rat & Mouse Block ✓
EPA Reg. No. 47629-11
Bromethalin 0.01% Pellet
EPA Reg. No. 47629-13
Difenacoum Rat and Mouse Pellets
EPA Reg. No. 47629-14
Difenacoum Rat and Mouse Blocks
EPA Reg. No. 47629-16
Difenacoum Rat and Mouse Place Packs
EPA Reg. No. 47629-17
Your amended applications of July 8, 2008

Purpose The purpose of each submission under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is to revise your label, to increase the additional package sizes/net contents for the above products.

Review All of the proposed additional packages sizes meet or exceed the minimum application amounts approved for claims of control of both rats and mice.

Conditions of Approval

This registration is not consistent with the Agency's May 28, 2008, "Risk Mitigation Decision for Ten Rodenticides." EPA anticipates cancellation of those existing products that are not consistent with the Risk Mitigation Decision to occur no later than June 4, 2011. In the meantime, EPA is approving new registrations and amendments to existing registrations of rodenticide bait products, on a time-limited basis, so long as the registrations do not present greater risks of unreasonable adverse effects than existing products. Accordingly, this registration is approved only subject to the condition that the registration shall expire on June 4, 2011. This condition of registration may be amended in conjunction with amendments to conform to the Risk Mitigation Decision. Absent such amendments, product released for shipment by the registrant after June 4, 2011, would be in violation of FIFRA.

Label

For each product, the labeling submitted with the above letter is acceptable, provided that you submit one (1) copy of final printed labeling to us, with the following changes, before you ship the product.

Under "STORAGE AND DISPOSAL", revise your "Disposal" text [Household Label] and revise "Container Disposal" to "Container Handling" [Non-Household Label] followed by instructions for each type of container. In general, you will be adding the new text required by the "Container Regulations" (40 CFR 156.140 - .159) and explained in PRN 2007-4 to the existing container disposal instructions.

We have suggested an acceptable text in Enclosure 2. Contact us if you need assistance in developing correct text. Also, all products distributed or sold in nonrefillable containers will need batch codes on the label or the container.

Consequence for non-compliance

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of these product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact me at 703-305-5407 (by phone), 703-305-6596 (by fax), or peacock,dan@epa.gov (by E-Mail).

Sincerely yours,

Daniel B. Peacock, Biologist
Insecticide-Rodenticide Branch
Registration Division (7504C)

Enclosure 2. Suggested "Storage and Disposal" text for Woodstream's products: 47629-11, 47629-13, 47629-14, 47629-16, and 47629-17.¹

STORAGE AND DISPOSAL: *[Household Labels]*

Do not contaminate water, food or feed by storage or disposal.²

STORAGE: Store in original container in a cool, dry place inaccessible to children and pets.

DISPOSAL: If empty: Nonrefillable Container. Do not reuse this container. Place in trash or offer for recycling if available. **Partly Filled Containers and Spoiled and Unconsumed Bait:** Call your local solid waste agency or 1-800-CLEANUP³ for disposal instructions. Never place unused product down any indoor or outdoor drain.

STORAGE AND DISPOSAL: *[Non-Household Labels]*

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container in a cool, dry place inaccessible to children, and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product, and spoiled and unconsumed bait, may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable Container. Do not reuse or refill this container. Offer for recycling if available or dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke. Call your Local Waste Agency for any questions on proper disposal.

1 Staff personnel for pesticide container regulations reviewed this text.

2 The use of "Do not contaminate water, food or feed by storage or disposal." is not required for a household product.

3 According to PR Notice 2007-1, the use of "1-800-CLEANUP" is optional.

MASTER LABEL – FRONT PANEL (Page 1 of 1)

BROMETHALIN RAT & MOUSE BLOCK

[Optional Logos/Marketing Claims]

- Kills Anticoagulant Resistant Norway Rats, Roof Rats and House Mice
- Norway rats, Roof rats, and House Mice usually consume a lethal dose in a single night's feeding, but it may take two or more days from the time of bait consumption for these rodents to die. Rodents cease feeding after consuming a toxic dose. This product is effective against anticoagulant-resistant rats and mice.
- [Kills] [Controls] Rats & Mice
- Indoor/Outdoor
- For use in Attics, Kitchens, Basements, Garages
- Can be used in Attics, Kitchens, Basements, Garages

**ACCEPTED
With COMMENTS
In EPA Letter Dated:
NOV 19 2008
Under the Federal Insecticide, Fungicide
and Rodenticide Act, As amended, for the
pesticide Registered under EPA Reg. No:
BY WT. 47629-11**

ACTIVE INGREDIENT:	
Bromethalin.....	0.01%
OTHER INGREDIENTS:	99.99%
TOTAL:	100.000%

KEEP OUT OF REACH OF CHILDREN

CAUTION: (See side [back] panel for additional precautionary statements)

Net Contents:

1.5 oz (2 X 0.75 ounce bait blocks) [to] 25.78 lb /412.5 oz (550 X 0.75 ounce bait blocks)

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, or using tobacco.

FIRST AID	
Have label with you when obtaining treatment advice.	
If swallowed:	<ul style="list-style-type: none">- Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.- Have person sip a glass of water if able to swallow.- Do not induce vomiting unless told to do so by the poison control center or doctor.- Do not give anything by mouth to an unconscious person.
If on skin or clothing:	<ul style="list-style-type: none">- Take off contaminated clothing.- Rinse skin immediately with plenty of water for 15-20 minutes.- Call a poison control center or doctor for treatment advice.
NOTE TO PHYSICIAN OR VETERINARIAN	
This is not an anticoagulant rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.	

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL! Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use out of reach of children and pets.

MASTER LABEL – BACK PANEL (Page 2 of 4)

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six (6) years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of product container and unused, spoiled or unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control Norway rats, roof rats, and house mice in the sites indicated below for Urban Areas and Non-Urban Areas. Don not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait. Wear water-proof gloves if you handle bait or dead animals.

Urban Areas: This product may be used in and around (within 15 feet of) homes, and in industrial, commercial, and public buildings. This product may also be used in transport vehicles (ships, trains, aircraft) and in and around (within 15 feet of) related port or terminal buildings. This product may be used in alleys.

Non-urban Areas: This product may only be used inside of homes and agricultural buildings.

SELECTION OF TREATMENT AREAS: Determine where rats and mice will most likely find an opening and consume bait. Generally, these areas are along walls, by gnawed openings or rub marks, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

BAITING:

Language based on container size:	
For package of 2, 0.75 oz. blocks	This product contains enough bait (1.5 oz.) to kill 1 to 3 rats.
For package of 4, 0.75 oz. blocks	This product contains enough bait (3 oz.) to kill 4 to 6 rats.
For package of 6, 0.75 oz. blocks	This package contains enough bait (4.5 oz.) to kill 5 to 8 rats.

MASTER LABEL – BACK PANEL (Page 3 of 4)

APPLICATION DIRECTIONS: Norway Rats and Roof Rats: Use 2 to 8 bait blocks per placement. Make placements at intervals of approximately 15 to 30 feet at appropriate locations in infested area. Adjust the amount of bait provided according to the level of rat feeding expected at each placement location. **House Mice:** Use 1 bait block per typical placement. Space placements at intervals of 8 to 12 feet in approximate locations in infested areas. Up to 2 bait blocks may be placed at points of extremely high house mouse activity.

Baiting Strategy (Rats and Mice): Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night’s feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

Follow-Up: Replace contaminated or spoiled bait immediately. Using water-proof gloves, collect and properly dispose of all dead animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water and harborage and rodent-proof structures as much as possible. If reinfestation does occur, repeat treatment. When a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

STORAGE AND DISPOSAL: [Household Labels]

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container in a cool, dry place inaccessible to children and pets.

DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available.

Partly Filled Containers and Spoiled and Unconsumed Bait: Call your local solid waste agency or for disposal instructions. Never place unused product down any indoor or outdoor drain.

STORAGE AND DISPOSAL: [Non-Household Labels]

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container in a cool, dry place inaccessible to children, and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product, and spoiled and unconsumed bait, may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

MASTER LABEL – OPTIONAL CLAIMS (Page 1 of 1)

[Additional - Optional Marketing/Advertising Claims]

- Palatable bait formulation
- Palatable formulation
- Contains Bromethalin
- 0.01% Bromethalin block
- Formulated for Norway rat, roof rat, and house mice control
- Demonstrated control of norway rats, roof rats, and house mice
- [Controls][Kills] norway rats, roof rats, and house mice
- [Controls][Kills] anticoagulant resistant rats & mice
- [Kills][Controls] rats & mice in and around the home
- [Kills][Controls] rats & mice both inside and outside the home
- Can be used Indoors or Outdoors for control of Rats & Mice
- For Indoor and Outdoor Rat & Mouse Control
- For indoor and outdoor use.
- Ready to use
- Convenient resealable bag
