If eggs, larvae or mated females are present before the application of CheckMate® LRz II Flowable, application of supplemental insecticides may be necessary. Immigration of female moths from adjacent external sources of infestation is not affected by the product and may reduce the level of control.

The use of CheckMate LRz II Flowable should always take place in the context of an Integrated Pest Management strategy. The use of other pest control measures may be necessary and should be based on proper pest monitoring and field scouting.
