Page Two-Notice of Registration Celaflor Rose Patch EPA Reg. No. 69129-3

3. Delete the statement, "Kills aphids in 2 to 4 days" or change it to, "Kills some aphid species on some plants as early as three days after application."

4. Delete the claim of fast acting from the front panel and from the statement:" Celaflor Rose Patch is a fast acting method to control aphids and other insects on roses and ornamental plants" on second page under the homeowner use heading. Submitted efficacy data do not substantiate the fast acting claim.

5. Add a statement that the patches may not provide adequate control against the green peach aphid for the first two weeks after application.

6. Change the statement "Protects for 8 weeks" to "May provide protection against some aphid species for up to 8 weeks," on the front panel and on second page under the homeowner use heading.

7. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records. A copy of the efficacy review is also enclosed for your perusal.

(0,0-Dimethyl S-[N-(methylcarbamoyl)methyl]	
phosphorodithioate	2.23%
Inert Ingredients:	<u>97.77%</u>
Total	100.00%

Keep Out of Reach of Children Caution See Back Panel for Additional Precautionary Statements.

EPA Reg. No.: 69129-(to be assigned) EPA Est. No.: 46260-KY-001

Net Contents: 20 patches

A Product of CELAFLOR GmbH, Ingelheim, Germany

### FOR HOMEOWNER USE:

For Use on Roses, Azaleas, Hibiscus, Schefflera, Viburnum, Fatsia and Ficus.

**CELAFLOR Rose Patch** is a fast acting method to control aphids and other insects on roses and ornamental plants. Using the same technology as nicotine and medicine patches, **CELAFLOR Rose Patch** continuously releases insecticide through the bark to all upper stems and plant parts. As insects suck out or feed on the plant's juices, they ingest the insecticide and die quickly. Aphids are controlled within 2 to 4 days and the protection lasts for 8 weeks. Controls mites, thrips, white flies, planthoppers, leaf miners and scale insects when used early at first appearance.

4 7 5

Not for use on or around fruit trees or vegetable plants.

#### **Directions For Use**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all directions carefully before use.

This package contains 5 envelopes, each containing 4 patches. Remove a green patch from the foil by holding only at the end of the patch, where there is no glue. Wrap one patch around the base of each main branch. For roses, choose locations without thorns or remove thorns that may be in the way. For stem roses, one patch at the upper part of the stem is sufficient. Press firmly to ensure that the patch sticks to the branch or stem. Remove and discard the patch when effectiveness has diminished (after 8 weeks).

#### Storage and Disposal

Storage: Store only in original container in a cool, dry place out of the reach of children and pets.

Disposal: Securely wrap original container in several layers of newspaper and discard in trash.

#### **Precautionary Statements**

Hazards to Humans or Domestic Animals

## Caution

Harmful if swallowed. Wash thoroughly with soap and water after handling.

First Aid	
IF SWALLOWED:	<ul> <li>Call a poison control center or doctor immediately for treatment advice.</li> <li>Have person sip a glass of water if able to swallow.</li> <li>Do not induce vomiting unless told to do so by a poison control center or doctor.</li> </ul>
IF IN EYES:	<ul> <li>Hold eyelid open and rinse slowly and gently with water for 15-20 minutes.</li> <li>Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
IF ON SKIN OR CLOTHING	<ul> <li>Rinse skin immediately with plenty of water for 15-20 minutes.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>

Note to Physician: Dimethoate is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

#### **Environmental Hazards**

This pesticide is toxic to wildlife and aquatic invertebrates. Do not apply directly to water.

#### Warranty Statement

The manufacturer warrants that this product conforms to the ingredient statement on the label and is reasonably fit for the purpose set forth in the Directions for Use. EXCEPT AS SO WARRANTED, THE PRODUCT IS SOLD AS IS. THE MANUFACTURER MAKES NO OTHER WARRANTY EXPRESS OR IMPLIED. The buyer assumes all risks of the use, storage or handling of this product.
