Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

BactiBlock® 101 RP1.47 is an antimicrobial additive to be used by compounding into many polymeric materials. It is designed to be incorporated during and after the manufacturing process to impart antimicrobial activity to the manufactured products. Approved post manufactured product upgrade applications are detailed in the label section titled "Coatings for Upgrade Applications." *BactiBlock® 101 RP1.47* suppresses the growth of algae, mold, mildew, fungi and bacteria which cause unpleasant odors, discoloration, staining, deterioration or corrosion only. No finished product incorporating *BactiBlock® 101 RP1.47* may make any public health claims relating to antimicrobial activity without first obtaining an EPA registration for the finished product which permits such claims. When incorporated into treated articles, this product does not protect users of any such treated article or others against food borne or disease causing bacteria, viruses, germs or other disease causing organisms.

This product may not be used for any applications involving food contact, food packaging, or drinking water.

FDA has determined this product to be exempt from regulation under 21 CFR 170.39, *Threshold of Regulation for Substances Used in Food Contact Articles.*

Do not incorporate this product into any food contact polymer unless the subject food contact polymer is approved and listed in 21 CFR, Part 174 through 186 (inclusive), or the United States Food and Drug Administration's "Food Contact Substance Notification System." Any incorporation of this product into an approved and listed food contact polymer must comply with the specific use conditions listed in 21 CFR, Parts 174 through 186 (inclusive), or in the United States Food and Drug Administration's "Food Contact Substance Notification System," for such food contact polymer. Any incorporation of this product into any food contact substances (including but not limited to non-polymer substances) other than an approved and listed food contact polymer is prohibited.

Types of Finished Products

Plastics - including films, sheets, slabs, and molded plastic parts

The additive may be incorporated into the finished product at up to 5.0% by weight or at least 0.1% for bulk plastics. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products.

Non-food contact uses only:

<ul style="list-style-type: none"> • automobile parts • shower curtains • mats • protective covers • tape • waste containers • brush handles • mops • vacuum cleaner bags • plumbing supplies and fixtures (including toilet bowl seats) • drain pan liners • office equipment and supplies (including binders, filing and storage systems, pens, pencils, markers, printers, facsimile machines, photocopiers, desk accessories, computers, keyboards, mice, scanners, and printers) • exercise equipment • sports equipment • Bathroom countertops • gaskets 	<ul style="list-style-type: none"> • siding for housing • bathroom hardware • flooring • floor coverings • footwear (including boots, sports equipment and tools) • insulation for wire and cable • insulators • indoor and outdoor furniture • spas, bathtubs, showers and filters and components • telephones, mobile devices, heau phones, headsets and accessories • cameras and imaging equipment • televisions and remote controls • general purpose containers • tubing • liners • non-woven fabrics • switches
--	---

Food contact uses:

Kitchen countertops

Fibers

The additive may be incorporated into the finished product at up to 5.0% by weight or at least 0.1% for fibers. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products.

Non-food contact uses only:**Interior furnishings**

- mattress cover pads and filling
- pillow covers
- sheets
- blankets
- fiberfill for quilts and pillows
- curtains
- draperies
- carpet and carpet underlay
- rugs
- upholstery
- mops
- towels
- wall covering fabrics
- cushion pads
- sleeping bags

Transportation –

- automotive and truck upholstery
- carpeting
- rear decks
- trunk liners
- convertible tops
- interior liners

Apparel –

- umbrellas
- outerwear
- sportswear
- sleepwear
- stockings
- socks and hosiery
- caps
- undergarments
- inner liners for jackets
- trim for outerwear and garments

Industrial and Other Household Items -

- artificial leather
- filters
- book covers
- mops
- cloth for sails
- ropes
- tents and other outdoor equipment
- tarps
- awnings
- artificial grass

Coatings, Films and Laminates

The additive may be incorporated into the coating, film or laminate applied to the finished product at up to 5.0% by weight, or at least 0.1% for paper or 0.1% for bulk plastics. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products. Types of coatings include water-borne, solvent-borne, 100% solids, radiation cure, liquid and powder.

Non-food contact uses only:

- walls
- wallboard
- floors
- fences
- rails
- concrete
- siding
- roofing
- shingles
- industrial equipment
- furniture
- arm rests and back rests

- bed frames
- tables
- shelving systems
- storage systems
- automotive and vehicular parts
- packaging
- paper products (including wall coverings, towels, book covers)
- barrier fabrics
- glazing for cement tile
- glazing for vitreous china used in plumbing fixtures (including toilets, sinks)
- spas, bathtubs, showers, and filters and components

Coatings for Upgrade Applications

Upgrade Applications are defined as the incorporation of *BactiBlock® 101 RP1.47* into polymeric coatings that are applied to articles onsite (after the article has been manufactured and is in the place of use). Coatings may be used on articles that have not previously incorporated the antimicrobial compound. *BactiBlock® 101 RP1.47* may be incorporated into the finished coating at up to 5% by weight, or at least 0.1% of the coating. Types of coatings include waterborne coatings/adhesives, solvent borne coatings and two part reactive coatings consisting of a resin and curing agent. Upgrade Applications are for onsite application at Commercial, Industrial or Institutional Establishments. Unless otherwise specified, the coating is applied to the entire article. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate application technique and amount of *BactiBlock® 101 RP1.47* for individual products.

Non-food contact uses only:	
<ul style="list-style-type: none"> chemical transportation equipment including railcars, tankers, trailers and components thereof 	<ul style="list-style-type: none"> building materials and components (including walls, ceilings and floors consisting of concrete, gypsum board, and cellulose ceiling tile)

Incorporate this product into coatings that are intended for application to the surface of articles. The purpose of the coating is to seal the article from moisture and corrosion. The purpose of *BactiBlock® 101 RP1.47* in the coating is to inhibit the growth of mold, mildew, fungus and bacteria that cause odor, discoloration, staining, deterioration or corrosion on the surface of the coating film. The product protects the applied coating itself from microorganism attack, not the underlying substrate. This product is not intended for remediation, prevention or control of existing or anticipated public health related microorganisms.

Paints

The additive may be incorporated into the finished product at up to 5.0% by weight or at least 0.1% for paint. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products.

Non-food contact uses only:	
<ul style="list-style-type: none"> Interior paints and coatings 	

Adhesives and Sealants

The additive may be incorporated into the finished product at up to 5.0% by weight, or at least 0.1% for paper or 0.1% for bulk plastics. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products.

Non-food contact uses only:	
<ul style="list-style-type: none"> adhesives used in the manufacture of wood and plastic composites adhesives for ceramic tile, wood, paper, cardboard, rubber and plastic glazing for windows grout sealants for pipes 	<ul style="list-style-type: none"> adhesives, sealants and insulating materials for appliances, bathrooms, showers, kitchens and construction plumbing adhesives grout and joint compound for countertops, building materials and components

Miscellaneous Applications

The additive may be incorporated into the finished product at up to 5.0% by weight. Contact Nanobiomatters BactiBlock, S.L. to determine the appropriate amount of *BactiBlock® 101 RP1.47* for individual finished products.

Non-food contact uses only:	
<ul style="list-style-type: none"> toilets sinks tile flooring 	<ul style="list-style-type: none"> stucco plaster cat litter drainage and sewage pipes

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

DANGER. Corrosive. Causes irreversible eye damage. Do not get in eyes or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Wear long-sleeved shirt and long pants, socks, shoes, and gloves.

Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

Storage and Disposal

Do not contaminate water, food or feed by storage and disposal.

Pesticide Storage: Do not store in areas accessible to children.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. **Pesticide Disposal:** Pesticide wastes are acutely hazardous. Improper disposal of pesticide, prepared solutions, or rinsate is a violation of Federal law. If wastes cannot be disposed of according to label directions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative of your nearest EPA Regional Office for guidance.
