

9.0 Addendum to the EPA Technical Support Document (TSD) for the Salt Lake City, Utah Area

This chapter presents additional documentation and information supporting the air quality designation for the Salt Lake City area as provided by Region 8. The following are technical corrections to the legal descriptions for Weber and Tooele Counties. A revised map reflecting the corrections is also provided.

1) Technical correction to legal description for Weber County: All sections within Township 7 North Range 1 West located within Weber County except for Sections 1, 2, 3, 4, 11, 12, 13 and 24.

This correction to the boundary description appropriately delineates the ridgeline which is the topographical boundary for Weber County.

2) Technical correction to legal description for Tooele County: All sections within Township 4 South Range 7 West except for Sections 29, 30, 31 and 32.

This correction to the boundary description is to appropriately delineate the jurisdictional boundary for Tooele County.

3) The map presented in the TSD to illustrate the nonattainment area boundary has been revised to reflect these corrections as follows:
