Dear Mr. Hoffman:

Re: Allegheny Energy Supply Company, LLC
Hatfield's Ferry Power Station
Comments to the May 20, 2014 letter and final report regarding
the Coal Combustion Residual (CCR) Site Assessment

On May 20, 2014, EPA sent to Allegheny Energy Supply Company, LLC ("AESC") a cover letter and one-page Final Report concerning a coal combustion residual site assessment performed at AESC's Hatfield's Ferry Power Station. The Final Report concluded that "the WWT Lagoons [at Hatfield's Ferry] do not fall within the scope of this assessment program given that their purpose is for fine particulate settling of low volume wastewater" FirstEnergy agrees with that conclusion.

We acknowledge and appreciate EPA's comments noted in the Final Report regarding two minor deficiencies related to vegetative growth on portions of the outboard and inboard slopes of the WWT Lagoons. We will continue to address those issues. We want to thank you for your assistance on the matter.

If you have any other questions or comments, please call or email David Hoone at 724-454-9280 or dhoone@firstenergycorp.com.

Sincerely,

Anthony Skicki
