Re: **Response to Final Report**
Coal Combustion Residue Impoundment Round 12-
Dam Assessment Report
GenOn Northeast Management Company –
Conemaugh Generating Station
New Florence, Pennsylvania

Dear Mr. Hoffman:

As requested in your March 28, 2014 Letter, GenOn Northeast Management Company, a subsidiary of NRG Energy, Inc. (NRG) is providing our response to the final Coal Combustion Residue (CCR) Impoundment Round 12 – Dam Assessment Report (Report) for the Conemaugh Generating Station.

According to the Report and Enclosure 1 of the March 28th letter, no recommendations by Dewberry Consultants LLC appeared to be warranted at this time for:

- Remedial work to ensure structural stability.
- Remedial work to ensure hydrologic/hydraulic safety
- Additional supporting technical documentation
- The surveillance and monitoring program of the management units
- The continued safe and reliable operation.

Conemaugh Generating Station will continue the surveillance and monitoring program as describe in the Report to better ensure the continued safe and reliable operation of the CCR impoundments.

Please do not hesitate to contact me at (724) 597-8310 if you have any questions or require additional information.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "Step M. Frank", with a long horizontal flourish extending to the right.

Stephen M. Frank, P.E.
Senior Environmental Specialist

cc: John Balog, General Manager, Conemaugh Generating Station
