

US EPA Stormwater Program's Webcast Series

Construction 101 with Barry Tanning of Tetra Tech, Inc.

Webcast: Wednesday, May 10, 2006

Two-hour audio Web broadcast

Eastern: 1:00 pm – 3:00 pm

Central: 12:00 pm – 2:00 pm

Mountain: 11:00 am – 1:00 pm

Pacific: 10:00 am – 12:00 pm

Session Description:

Since March of 2003, all construction sites across the nation with a disturbed area of one acre or larger have been required to comply with Clean Water Act requirements to reduce polluted runoff. These requirements include coverage under a state or EPA-issued NPDES permit, development and implementation of a Storm Water Pollution Prevention Plan, weekly inspections and documentation of runoff controls, and notification of regulatory authorities when the site has been stabilized. More than 5,000 municipal stormwater permittees are also required to develop a program to oversee this process in their jurisdictions. State water resource agencies and EPA provide this service in non-municipal areas. This presentation will review the basic construction oversight requirements for the municipal stormwater permittees, describe permit requirements for all regulated construction sites, review site-level runoff controls, and provide a brief overview of the typical inspection approach. This session will be useful for state, local, and contractor staff responsible for developing, implementing, or overseeing construction site runoff controls.

Guest Speakers: Nikos Singelis of EPA's Stormwater Program and Erik Nelson of Douglas County, Colorado

Registration: You must register in advance to attend this webcast. Visit the NPDES Web site at www.epa.gov/npdes/training to register.

Note: Your computer must have the capability of playing sound in order to attend this webcast.

Tentative future dates and topics

7/12/06 Stormwater Utilities 201 (TBD)

8/9/06 Getting in Step 101 (TBD)

9/13/06 Illicit Discharge Detection and Elimination (IDDE) 101 – Program Development (with Jennifer Zielinski from the Center for Watershed Protection)

Additional topics to expect next year:

- Low Impact Development 201
- IDDE Field Methods
- Getting in Step 101
- Construction Site Inspections 201
- Municipal Maintenance
- Evaluating Your MS4 Program
- Developing an effective SWPPP for construction sites
