

US EPA Stormwater Program's Webcast Series

Construction SWPPPs from A to Z: Everything You Ever Wanted to Know and More!

Webcast: Wednesday, January 10, 2007

Two-hour audio Web broadcast

Eastern: 12:00 pm – 2:00 pm

Central: 11:00 am – 1:00 pm

Mountain: 10:00 am – 12:00 pm

Pacific: 9:00 am – 11:00 am

Session Description:

Construction sites disturbing one acre or more of land are required to obtain NPDES permit coverage for their stormwater discharges. These sites must develop stormwater pollution prevention plans (SWPPPs) to ensure that they don't adversely impact water quality. Building on EPA's popular webcast on construction held on March 10, 2006, this webcast will focus on the key elements to developing an effective SWPPP. The webcast will summarize EPA's new guidance *Developing Your Pollution Prevention Plan: A Guide for Construction Operators* which covers assessing the construction site, selecting appropriate erosion and sediment controls, selecting appropriate good housekeeping BMPs, and inspections, maintenance and recordkeeping issues. The webcast will also discuss common problems found on construction sites from the perspective of an EPA inspector.

Speakers: Nikos Singelis of EPA's Stormwater Program; Barry Toning of Tetra Tech, and an EPA Regional Stormwater Inspector.

Registration: You must register in advance to attend this webcast. Visit the NPDES Web site at www.epa.gov/npdes/training to register.

Note: Your computer must have the capability of playing sound in order to attend this webcast.

Tentative future dates and topics

3/7/2007	MS4 Compliance
5/9/2007	Social Marketing
7/11/2007	IDDE 201 - Field and lab methods
9/5/2007	Post-Construction 201

The materials in this Webcast have been reviewed by EPA staff for technical accuracy. However, the views of the speakers and the speaker's organization are their own and do not necessarily reflect those of the EPA. Mention of any commercial enterprise, product, or publication does not mean that EPA endorses them.
