

US EPA Stormwater Program's Webcast Series

Post Construction 101 with Nikos Singelis of EPA's NPDES Stormwater Program

First Webcast: Thursday, March 16, 2006

Two-hour audio Web broadcast

Eastern: 1:00 pm – 3:00 pm

Central: 12:00 pm – 2:00 pm

Mountain: 11:00 am – 1:00 pm

Pacific: 10:00 am – 12:00 pm

Session Description:

Over 5,000 municipal stormwater permittees are required to develop a post-construction program to address stormwater runoff from new development and redevelopment. The post-construction programs must include requirements to install BMPs and ensure maintenance of those BMPs. To implement an effective program, municipalities need to look beyond the individual site to assess how post-construction controls will affect the entire watershed. This presentation will describe the post-construction program requirements and how innovative programs such as **Low Impact Development** and **Smart Growth** can be used to help meet these requirements.

Guest Speaker: Geoffrey Anderson, Director of EPA's Smart Growth Program.

Registration:

You must register in advance to attend this webcast. Visit the NPDES Web site at <http://www.epa.gov/npdes/webcasts/postconstruction101> to register.

Note: Your computer must have the capability of playing sound in order to attend this webcast.

Tentative future dates and topics

5/10/06 Construction 101 (with Barry Tanning of Tetra Tech)

7/12/06 Stormwater Utilities 201 (TBD)

9/13/06 Illicit Discharge Detection and Elimination (IDDE) 101 – Program Development (with Jennifer Zielinski from the Center for Watershed Protection)

Additional topics to expect next year:

- Low Impact Development 201
- IDDE Field Methods
- Getting in Step 101
- Construction Site Inspections 201
- Municipal Maintenance
- Evaluating Your MS4 Program
- Developing an effective SWPPP for construction sites

The materials in this Webcast have been reviewed by EPA staff for technical accuracy.
