

US EPA Stormwater Program's Webcast Series

The Art & Science of Stormwater Retrofitting

Webcast: Wednesday, April 9, 2008

Two-hour audio Web broadcast

Eastern: 12:00 pm – 2:00 pm

Central: 11:00 pm – 1:00 pm

Mountain: 10:00 am – 12:00 pm

Pacific: 9:00 am – 11:00 pm

Session Description:

A new frontier in stormwater management is retrofitting stormwater management practices into watersheds that have already been developed. This approach can help restore watersheds by providing stormwater treatment in locations where it was not originally included. The Center for Watershed Protection will discuss their new manual, *Urban Stormwater Retrofit Practices* (August 2007), which addresses retrofitting existing urban lands, such as parking lots, residential streets, conveyance systems and landscaped areas. It also discusses ways to develop and implement a successful retrofit program. The manual provides detailed information on the pollutant removal performance and cost of various retrofit practices and practical guidance that can be used to identify, evaluate and prioritize potential retrofit projects.

Speakers: Dan Frisbee, City of Charlottesville, VA
Mike Novotney, Center for Watershed Protection
Nikos Singelis, U.S. EPA's Stormwater Program
Deb Caraco, Center for Watershed Protection

Registration: You must register in advance to attend this webcast. Visit the NPDES Web site at www.epa.gov/npdes/training to register.
