MEMORANDUM

SUBJECT: POTW Pretreatment Program Development Guidance

FROM: Martha G. Prothro, Director
Permits Division (EN-336)

TO: Users of the Guidance Manual for POTW Pretreatment
Program Development

The U.S. Environmental Protection Agency (EPA) initially
distributed this manual in October 1983 to provide local POTWs
with information to assist them in developing and submitting
approvable pretreatment programs. Although EPA recently exhausted
its initial printing of the manual, we are still receiving
requests and thus we have printed additional copies.

While much of the manual's information is still applicable,
you will find that some of it is outdated. Specifically, the
EPA Regional Pretreatment Coordinators and the individual State
Pretreatment Contacts listed in Appendix A have changed since
the manual was developed. (A revised list of Regional and State
contacts is attached to this memorandum.) Also, there have
been several amendments to the General Pretreatment Regulations
(40 CFR Part 403) since the first printing. These amendments
may supersede the specific programmatic requirements contained
in the manual's text. Finally, the EPA has developed and
distributed additional guidance material which is not listed in
Appendix B of the manual. This additional guidance addresses the
implementation of categorical pretreatment standards for specific
industry categories (i.e., electroplating, metal finishing and
iron and steel manufacturing) and specific elements of the pre-
treatment program including use of the combined wastestream
formula. A complete list of the guidance manuals which are
currently available is attached for your use and information.

Another EPA manual will be issued soon. The manual will
provide Control Authorities with guidance on the implementation
of their approved pretreatment programs and on the implementation
and enforcement of categorical pretreatment standards. This
manual will include specific guidance on the identification of
significant industrial users, on compliance monitoring by Control
Authorities, and on the general implementation responsibilities
of Control Authorities.
To ensure that you are using the most recent guidance, I recommend that you contact your appropriate EPA Regional Pretreatment Coordinator or the appropriate State Pretreatment Contact. I have attached our most recent list of each for your use and information.

If you have any difficulty in obtaining the latest available information using the Appendix A information, you may write to the U.S. Environmental Protection Agency, Permits Division (EN-336), Washington, D.C. 20460, Attention: Pretreatment Program Staff.

Thank you.

Attachments
7. AVAILABILITY OF INFORMATION

The documents listed below have been developed by EPA to assist States, POTWs, and industry to understand their roles in the development and implementation of the National Pretreatment Program.

Memorandum from Rebecca Harmer, Director, Office of Water Enforcement and Permits to Regional Water Management Division Directors and NPDES State Directors re: Local limits Requirements for POTW Pretreatment Programs, August 5, 1985.

Additional guidance is expected to be available in the near future. For example, EPA intends to publish additional material, similar to that for the Electroplating and Metal Finishing Standards, addressing other industrial categories.

Inquiries for availability of the above documents may be made to:
