

Application For Certification
Part1
Individual application for 2027 Model Year

Durability Group	VNSXEEVNN420
Evaporative / Refueling Family	N.A.
Test Group	VNSXV0000D4A
Test Group Description	BEV (Battery Electric Vehicle) Federal LDV
Exhaust Emission Standard	Federal Tier 4 Bin 0, CFV-ZEV, ILEV
Evaporative Emission Standard	N.A.
Vehicles Covered	NISSAN ARIYA e-4ORCE 87kWh (Canada) NISSAN ARIYA PLATINUM+ e-4ORCE 87kWh 20" Wheels (Canada)
Vehicles Run	URCP97-00 (MCT TN:VNSX10093145)
Issue Date	March 30, 2026
Response Requested By	May 25, 2026
For Questions, Contact	Ryuichi Haya Telephone No. 248-488-4654

NISSAN MOTOR CO., LTD.

Part1
TABLE OF CONTENTS

Section	Title	Application	
		General	Individual
1	Correspondence and Communications	X	
2	Durability Group Description	X	
3	Evaporative/Refueling Family	X	
4	Durability Procedure Description	X	
5	Test Group Description		X
6	Test Vehicle Description		X
7	Test Results		X
8	Emission Testing Waiver Statement and Other Statement	X	X (Excluding BEV Interim Tier 4)
9	OBD System Description		X
10	Description of Alternate-fueled Vehicles		X
11	AECD Description		X
12	Description of Vehicles Covered by Certificate and Test Parameters		
	(1) Starting	X	
	(2) Shifting	X	
	(a) Automatic transmission	X	
	(b) Electric vehicle	X	
	(c) Manual transmission		X
	(3) List of Certified Vehicles		X
	(4) Test Parameter		X
	(5) Fuel storage system leak test method	X	
13	Projected Sales	X	
14	Request for Certification		X
15	Other Information		
	(1) Fee Filing Form		X
16	Confidential Information		
	(1) OBD System Description (related to Sec 9 in Part 1)		X
	(2) Catalyst Information and GPF Information (related to Sec 2 in Part 1)	X	
	(3) Durability Procedures (related to Sec 4 in Part 1)	X	
	(a) Bench aging procedure for Exhaust Emission (flow)	X	
	(b) Bench aging procedure for Exhaust Emission (aging conditions)		X
	(c) Bench aging procedure for Evaporative Emission	X	
	(4) Projected Sales (related to Sec 13 in Part 1) and Applicable Standard	X	
	(5) Phase-in Plan (related to Sec 13 in Part 1)	X	
	(6) Catalyst Code Identification (related to Sec 3 in Part 2)	X	
	(7) Projected Fleet Average Calculation	X	
	(8) AECD Description (related to Sec 11 in Part 1)		X
	(9) Description of Electric Vehicles		
	(a) Battery Information (related to Sec 12(3) in Part 1)		X
	(b) Summary Information (related to Sec 7 in Part 1)		X
	(10) The procedure of setting maintenance mode (related to Sec12(1) in Part 1)	X	
	(11) Engine Oil Specification	X	

SEC5

5. Test Group Description

Test Group Name	Fuel	Sales area	Vehicle Class	Emission St'd Class
VNSXV0000D4A	Electricity	CAN	Federal LDV	Federal Tier 4 Bin 0, CFV-ZEV, ILEV

VNSXV0000D4A

Issue date: Refer to cover page

Revision date:

6. Test Vehicle Description

Vehicle Class	Model Covered	Engine Code	Motor Model	Transmission	ETW (lbs)	GVWR (lbs)	Axle Ratio	Tire	
								Size	Type
Federal LDV	ARIYA e-4ORCE 87kWh	EVA AK	AM67	Auto (Fixed single Speed)	5250	5919	Fr: 8.896 Rr: 7.679	235/55R19	All season
								255/45R20	

SEC7

7. Test Results

Test Loc.	Test Number	Mode	Sales Area	Official Test (marked by X)	Certification Level
Mfr	VNSX10093145	MCT All-Electric Range Test	CANADA	X	Refer to the Certification Summary Information Report

VNSXV0000D4A

Certification Summary Information Report

Manufacturer	Nissan Motor Co., Ltd.	Manufacturer Code	NSX
Test Group	VNSXV0000D4A	Evaporative/Refueling Family	--
Certificate Number	--	CARB Executive Order #	--
Certificate Issue Date	--	Certificate Revision Date	--
Certificate Effective Date	--	Conditional Certificate	--
CSI Revision #	--	CSI Submission/Revision Date	03/05/2026 09:35:54 PM
Model Year	2027		

Test Group Information

CSI Type	Update for Correction	Running Change Reference Number	--
GHG Exempt Status	Not Exempt		

Drive Sources and Fuel(s)

Drive Source #1: Electric Motor

Fuel	Basic Fuel Metering System	Lean Burn Strategy Indicator
Electricity	--	--

Hybrid Indicator	No		
Multiple Fuel Storage	--	Rechargeable Energy Storage System Indicator	Yes
Multiple Fuel Combustion	--	Off-board Charge Capable Indicator	Yes
Fuel Cell Indicator	No	EPA Vehicle Class	LDV
Federal Clean Fuel Vehicle	Yes	Federal Clean Fuel Vehicle Standard	ZEV
Federal Clean Fuel Vehicle ILEV	Yes	California Partial Zero Emissions Vehicle Indicator	No
Durability Group Name	VNSXEEVNN420	Durability Group Equivalency Factor	5.0
Reduced Fee Test Group	No	Certification Region Code(s)	FA, CA
Complies with HD GHG 2b/3 regulations?	No		
Introduction into Commerce Date	--	CAP2000 Conditional Certificate?	N/A
Independent Commercial Importer?	--	Alternative Fuel Converter Certificate?	--
SFTP Federal Composite Compliance Identifier	Not Applicable	SFTP Tier 2 Composite CO Option	No
SFTP LEV-III Composite Compliance Indicator	No		
OBD Compliance Type	CARB	OBD Demonstration Vehicle Test Group	VNSXT01.53CF
Test Group OBD Compliance Level	Full - no deficiencies	Number of Test Group OBD Deficiencies	0
OBD Deficiencies Comments	This vehicle is exempted from OBD requirement because this vehicle is BEV.		
Mfr Test Group Comments	Durability Group Equivalency Factor is not available because this vehicle is BEV.(5.0 is a dummy) Sales volume for CAN		
Mfr Exhaust / Evap Standards Comments	--

[Other system]

-Climate control system

The climate control system equipped with electric motor-driven compressor/ Heat-Pump + Air PTC heater system.

The system uses R-1234yf refrigerant and operates on 12volts DC/ 270 volts DC.

The vehicle are also equipped with a "pre-conditioning" system that turns on air conditioning system before passengers enter the car.

The vehicle is not equipped with a fuel-fired heating system.

Charging system information (3)

Charging system information (Summary of owner's manual)

This vehicle is an electric vehicle and it requires electricity to operate. The LI-ion battery is the only source of power to operate the vehicle.

It is important to conserve power and plan your charging needs when you drive to avoid completely discharging the LI-ion battery.

There are the following methods of charging the LI-ion battery:

- AC Level 2: Normal charge
- AC Level 1: Trickle charge
- DC Level 3: DC Fast Charge

The time to completely charge the vehicle LI-ion battery varies based on the state of charge of the LI-ion battery, condition

and age of the LI-ion battery, temperature of the LI-ion battery, ambient temperature and condition of the power source connected to the vehicle, and whether the electric equipment (such as the air conditioner, which consumes electric power) is used.

AC Level 2: Normal charge

NISSAN recommends using normal charging for usual charging of the vehicle. Use of DC Fast Charge should be minimized in order to help prolong LI-ion battery life.

Normal charging uses L1 & L2 EVSE (Electric Vehicle Supply Equipment) (if so equipped), or an SAE J1772 compliant

charging device connected to a dedicated AC 220 - 240 volt circuit. L1 & L2 EVSE (if so equipped) is provided with the vehicle (if so equipped). The charging device is a home charging dock installed in your home by a qualified electrician. It is recommended that you visit a NISSAN certified ARIYA dealer. For additional information, see "How to normal charge (AC 220-240 volt) by charging device" (P.47) or "How to normal charge (AC 220-240 volt) by L1 & L2 EVSE (if so equipped)" (P.57).

AC Level 1: Trickle charge

Trickle charging is not recommended for regular use because it takes more time than normal charging. Trickle charge can

be used when it is necessary to perform an emergency charge at a destination such as a friend's house.

Trickle charge uses the EVSE (Electric Vehicle Supply Equipment) (if so equipped) provided with the vehicle to connect the vehicle to an AC 110-120 volt, 15A dedicated outlet. The outlet should be protected by a circuit breaker to avoid overloading the circuit or other electrical hazard.

For additional information, see "How to trickle charge (AC 110-120 volt) by L1 & L2 EVSE (if so equipped)" (P.49).

DC Level 3: DC Fast Charge

A vehicle equipped with a DC Fast Charge port is compatible with the NACS (J3400) connectors on charging stations. Charging stations are UL certified and safe to use in the US.

DC Fast Charging is possible (even several times a day). If the battery temperature is hot, in order to protect the battery, power of the DC Fast Charging will be limited.

Public charging:

This vehicle is compatible with any public charging station that is SAE J3400 compliant. If you attempt to charge from a noncompliant charging station, you may not receive a complete charge, or you

may not be able to charge at all due to hardware and software differences. NISSAN is working with states, municipalities, utility companies and others to assist in the preparation of markets and infrastructure. However, NISSAN makes no representations that public charging stations will be available in locations where you wish to operate the vehicle, nor can NISSAN predict the period of time it may take for public charging infrastructure to be developed in your area. Depending on where you live or drive, there may not be sufficient public charging stations available to meet your particular needs for driving range and charging away from your home. Trip planning is therefore

important, and you should plan trips with these facts in mind.

Even when charging the LI-ion battery using a charger capable of more than the vehicle's maximum charging power, the maximum power from the charger will be limited to the vehicle's maximum charging power, it will be changed based on the vehicle status.

During charging the power limit to the vehicle may change depending on the capacity of the LI-ion battery. This is normal and does not indicate a malfunction.

The time needed to charge the LI-ion battery using the DC Fast Charger depends

on many factors including the LI-ion battery temperature and the type of DC Fast Charger used.

It may take more time to charge the LI-ion battery using the DC Fast Charger if the vehicle is parked in a cold location for a long time.

It may take more time to charge the LI-ion battery using the DC Fast Charger if the temperature of the LI-ion battery is high or low.

Charging system information (4)

Charging system information (Summary of owner's manual)

<Equipments for Normal charge/ Trickle charge>

Normal

To start normal charging

- ① Charge Connector
- ② Release Button
- ③ Genuine NISSAN exchangeable plug
- ④ Plug
- ⑤ Cap
- ⑥ Indicator light

⑦ Control box

NOTE:
Charge schedule, remote charge and immediate charge can be performed in the normal charge mode. For additional information, see "charging methods" (P.74).

1. Push the P (Park) position switch to place the vehicle in the P (Park) position and apply the parking brake.
2. When charging the Li-Ion battery, place the power switch in the OFF position.
3. Open the Normal Charge Port (J1772) lid and cap on the driver side of vehicle. For additional information, see "Charge port lid" (P.304).
4. Take out the EVSE (if so equipped) from the luggage compartment.

When your vehicle is equipped with the exchangeable plug, connect the exchangeable plug for AC 240 volt to the control box.

To connect the exchangeable plug to the control box:

Align the mark of the plug ① with the mark of the control box ② as shown in the illustration.

Insert the plug into the control box. Rotate it until a click sounds.

Pull the cable to ensure it is securely connected.

To remove the exchangeable plug from the control box:
Rotate the plug of the exchangeable plug backward.

5. Connect the electrical plug to the AC 220 - 240 volt, 50A dedicated electrical

outlet. If it is connected normally, the green light on the EVSE (if so equipped) control box indicator light illuminates.

Trickle

To start trickle charging:

- ① Charge Connector
- ② Release Button
- ③ Genuine NISSAN exchangeable plug
- ④ Plug
- ⑤ Cap
- ⑥ Indicator light

⑦ Control box

NOTE:
Charge schedule, remote charge and immediate charge can be performed in the trickle charge mode. For additional information, see "charging methods" (P.74).

1. Push the P (Park) position switch to place the vehicle in the P (Park) position and apply the parking brake.
 2. When charging the Li-Ion battery, place the power switch in the OFF position.
 3. Open the Normal Charge Port (J1772) lid and cap on the driver side of vehicle. For additional information, see "Charge port lid" (P.304).
 4. Take out the EVSE (if so equipped) from the luggage compartment.
- When your vehicle is equipped with the exchangeable plug, connect the exchangeable plug for AC 120 volt to the control box.

To connect the exchangeable plug to the control box:

Align the mark of the plug ① with the mark of the control box ② as shown in the illustration.

Insert the plug into the control box.

Rotate it until a click sounds.

Pull the cable to ensure it is securely connected.

To remove the exchangeable plug from the control box:

Rotate the plug of the exchangeable plug backward.

5. Connect the electrical plug to the AC 110 - 120 volt, 15A dedicated electrical

outlet. If it is connected normally, the green light on the EVSE (if so equipped) control box indicator light illuminates.

Charging system information (5)

Charging system information (Summary of owner's manual)

CHARGING METHODS

Example

The Electric vehicle screen allows you to use the following features:

Available items may vary depending on models, specifications, software versions and conditions.

- State of charge gauge, driving range, charge remaining time (while-charging)
- Charge Limit (%)
- Climate Schedule
- Charge Schedule
- Battery Cooling Assist
- Battery Heater
- Energy Usage
- Battery Temperature Management Status
- Charging Stations
- Plug-In Reminder
- Amperage Limit

*1 The road speed fan to all test cycles.
*2 Set in maintenance mode. Refer to Type B of SEC16(10)-2.
*3 After setting maintenance mode, turn off VDC in the System section of VDC Setting.
*4 After setting maintenance mode, turn off Emergency Braking in the Emergency Assist section of Driver Assistance.
*5 After setting maintenance mode, turn off Speed Limit Sign in the Traffic Sign Assist section of Driver Assistance.
*6 After setting maintenance mode, turn off Speed Limit Warning in the Traffic Sign Assist section of Driver Assistance.
*7 After setting maintenance mode, turn off Rear Auto Braking in the Parking Assist section of Driver Assistance.
*8 Cancel the automatic P position function by Nissan development tool.

12. Description of Vehicles Covered by Certificate and Test Parameter

(4) Test Parameter

Testing Related Information

-Charging procedure

- 1) Confirm the vehicle is shut off by checking the meter screen is turned off.
- 2) Push open the charge port door on the vehicle.
- 3) Remove the charge connector from the holster.
- 4) Fully insert the charge connector into the charge port.
- 5) Charging begins automatically. The Plug in indicator light comes on the meter screen and start flashing.
- 6) When the vehicle is fully charged, the Plug in indicator light will stop flashing and turn solid.
- 7) Remove the charge connector from the charge port. Make sure to firmly secure the charge connector in its holster.
- 8) Close the charge port door on the vehicle.

-Load setting for dyno procedure

- 1) With depressing the brake pedal, push the “START” switch. The vehicle is set in "Ready" condition.
- 2) Shift into “N” position with depressing the brake.
- 3) Start the Load Set
- 4) When the load set is finished, push the "START" switch once to shut off vehicle system

-Safe handling of battery system Information

When working on high voltage cable, wear antistatic boots and insulated gloves. And remove the Shut Down switch.

If high voltage battery is damaged, there is a risk of short circuit to vehicle body due to leakage of electrolyte, and it is necessary to beware of electric shock.

When damaged, the battery may emit white fumes (vaporized electrolyte) due to short circuit.

- > If this happens, cool the battery with hose streams.
- > Since electrolyte is flammable, fire sources are prohibited.
- > Electrolyte liquid and vapor are not toxic, but must not be directly inhaled in large quantities.

14. Request for Certification

Request for Certificate to EPA

Test Group	VNSXV0000D4A
Exhaust emission control system number	1 of 1
Evaporative/Refueling Family	N.A.
Carline	ARIYA PLATINUM+ e-4ORCE 87kWh 20" Wheels
	ARIYA e-4ORCE 87kWh

Nissan Motor Co., Ltd. requests that EPA issue a 2027 model year certificate of conformity for the above specified test group and evaporative/refueling family combination more fully described in this application. This combination complies with the following applicable emission standard.

Federal	X
California & 177 States	

This combination complies with all applicable regulations contained within 40 CFR Part86, the application is current as of this date.
The exhaust and evaporative/refueling emission test results support this request for certificate.
