SUMMARY OF INFORMATION REVIEWED AND FINDINGS

718 2/6/97.
This application is for registration of a new product as biofouling and slime control in pulp and paper mills sy. recirculating cooling water systems, coating preservation, dispersant preservation.

A. Confidential Statement of Formula page 2 of 2 dated 6-6 is in compliance with PR Notice 91-2, it agrees with the label and is acceptable.

Confidential Statement of Formula page 1 of 2 does not agree with the CSF page 2 of 2 and it should be revised.

Please note that the total amount in both CSFs should be the same, since one CSF is before the reaction and the other is after the reaction.

B. For use of this product in manufacture of food grade paper and paper coatings registrant should provide an opinion letter from FDA that this entire formulation including "peracetic" acid and [REDACTED] may be used in paper mills and in paper coatings.
