

Memorandum

Date: 8 December 1981

Subject: EPA File Symbol: 499-EEN WHITMIRE PERMA-DUST PT 240
Caswell #109

From: B. T. Backus
IRB/TSS

To: Mr. William Miller
Product Manager 16

Review and Comments:

Rereview of the data in Acc. 245379 indicates:

- 1) Product tested 
- 2) 3/6 unwashed, 1/3 washed eyes showed corneal opacity on day 21. Under the test conditions, this product is in toxicity category I by eye exposure hazard.
- 3) We could accept an eye irritation study conducted by spraying this product into rabbit eyes, and revise precautionary labeling and signal word, if appropriate. We would expect such a study to more precisely define the eye exposure hazards associated with this product (a spray) than the study in Acc. 245379.
