CERTIFIED MAIL

E. M. Bellet, Ph.D.
Chemical Consultants International, Inc.
7270 West 98th Terrace, Suite 100
Overland Park, Kansas 66212

SUBJECT: Review of Product Chemistry Data Submitted by APC Holdings for the Reregistration of Monosodium Methanearsonate (MSMA).

Dear Dr. Bellet:

We have completed our review of the data you submitted to fulfill guidelines (GDLNs) 61-1, 61-2(a+b), 62-1, 62-2, and 62-3 for MSMA, MRID# 41702001 and 42474101.

The above MRID# submissions were reviewed and the Agency's has determined that they satisfy the following guideline requirements:

The Agency would note that if the manufacturing process/site or sources/purities of the starting materials change, you must submit information concerning the starting materials and manufacturing process and preliminary analysis data to confirm that the technical grade active ingredient produced at the new site/via the new process has not changed.

GDLN 61-2(a+b), Beginning Materials MRID# 41702001
GDLN 62-1, Product Analysis MRID#s 41702002, 42474101

The Agency acknowledges receipt of data for the following guidelines. However, data concerning these guidelines are not required for the technical grade active ingredient:

GDLN 61-1, Chemical Identity
GDLN 62-2, Certification of Limits
GDLN 62-3, Methods to Verify Limits
