Chemistry Branch II - Reregistration Support
Health Effects Division (H7509C)

TO: H. Toma, PM Team 74
Reregistration Branch
Special Review and Reregistration Division (H7508C)

DowElanco has requested a meeting with Agency Staff concerning protocols they have submitted for plant metabolism and rotational crop accumulation of [¹⁴C]1,3-dichloropropene.

The plant metabolism protocols are presently under review in the branch (DEB #7285). The protocol for a rotational crop accumulation study, which was submitted to CBRS along with this request for a meeting, should be redirected to the Environmental Fate & Ground Water Branch for review. CBRS staff will be available for a meeting with DowElanco, if they request one, after they have received our review of their protocols.

cc: W. Smith, Telone Reg. Std. File, SF, RF, C. Furlow (PIB/FOD),
Janet Burrell (PIB/FOD).
