Note on Telone Submission:

The attached review request was for a review of the text for the registration standard for Telone. This review was completed prior to the "bean sheet" submission because SRB requested a quick review of the document and said a formal request would follow.

The Registration Standard for Telone was completed (see attached copy) in September 1986 and includes chapters reviewed by me that were the subject of the review request. Since the Standard has been completed for some time, this submission is being done to clear this item from the tracking system and to explain the circumstances surrounding this "technically overdue" review. I request that this item be deleted from the tracking system.
