Reevaluation No. 1 for Dibrom (naled).

PP No. OF0975

Reg. No. 239-1281

Chevron

Revised July 1, 1971, March 31, 1972, and April 24, 1972.

I. Introduction

1. See evaluation dated June 24, 1970

2. Revision of 7-1-71

- a. Sugar Cane (Puerto Rico only) 1/2 pt. in 4 gal. 7A by air. Repeat as necessary. PHI 2 months. Do not pasture livestock in treated areas.
- b. Alfalfa PHI 1 day.
- c. Broccoli, cabbage, cauliflower, Brussels sprouts, celery, and grapes. PHI 1 day.
- d. Beans and soybeans forage - 7 days of harvest or foraging.
- e. Sugar beets PHI 2 days.
- f. Cotton - do not graze within 14 days after application.
- g. Alfalfa - PHI 1 day, do not graze treated fields.
- h. Hops - PHI 4 days, do not feed hopyard waste.

3. All uses in this petition are registered with the exception of Sugarcane and petitioner withdrew sugarcane.

II. Recommendation

All uses registered, and we have been told to accept registered uses when a tolerance is given. Therefore, we will have to go along with the registration when the tolerance is established.

Pat: Previous evaluation had in our opinion. We do not give opinions now, but if we did it would be the same.

2. Revision of March 31, 1972 and April 24, 1972.
