Dr. Schmidt

REPLY TO
ATTN OF:

DATE: February 7, 1973

SUBJECT:

Dimethoate - Petitioner is proposing the establishment of a tolerance of 1.0 ppm of dimethoate and its oxygen analog in or on grapes.

TO:

Mr. Lee E. TerBush, Acting Chief
Coordination Branch
Registration Division

Pesticide Petition No. 3F1301

American Cyanamid
P.O. Box 400
Princeton, N.J. 08540

Petitioner's letter of 1/8/73 to Mr. Morgan is in response to a request made by CB for the actual residue levels in dried grape pomace. If CB agrees with petitioner's claims that residues of dimethoate in the pomace did not approach the already established tolerance of 1.0 ppm, no additional toxicological review is necessary.

Robert P. Schmidt 2/8/73
