

DATA EVALUATION RECORD

CHEMICAL: Diuron

FORMULATION: Technical, 98.2% A.I.

CITATION: STODIU05. U.S. EPA. 1979. Report on the survival and reproduction of Daphnia magna exposed to diuron, 98.2% active ingredient. (U.S. EPA, Chemical and Biological Investigations Branch, Beltsville, MD, Life Cycle Test #2418, 7/26/79, unpublished report).

REVIEWED BY: Ann Stavola
Aquatic Biologist
HED/EEB

DATE REVIEWED: June 8, 1982

TEST TYPE: Life cycle - 28 days
Daphnia magna

REPORTED RESULTS: Diuron did not appear to adversely affect adult survival or average total production per surviving adult at the concentrations of 6 to 200 ppb. *OK*

REVIEWER'S CONCLUSIONS: The study is scientifically sound and meets our guideline requirements for an aquatic invertebrate life-cycle study.
