MEMORANDUM

OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

SUBJECT: EUP with UAP 307 (EPA Reg. No. 34704-EUP-RE and RR, Dyfonate and Phorate) for Corn and Potatoes, Respectively

FROM: James Akerman, Chief *Summary J. Cook fw 12-6-88*
Ecological Effects Branch
Hazard Evaluation Division (TS-769c)

To: W. Miller, Product Manager Team (16)
Insecticide - Rodenticide Branch
Registration Division (TS-767c)

Ecological Effects Branch (EEB) cannot adequately address the hazard of phorate to avian and aquatic species without the data requested in the Ecological Effects chapter (7-27-88) of the phorate Second Round Review for the Registration Standard. The initial ecological effects data, field incidents, and field tests have shown phorate to be sufficiently toxic to require the following additional studies:

1. 71-4 Avian Reproduction - Upland Gamebird
2. 73-3 Estuarine and Marine - Shrimp LC_{50}
3. 74-4 Fish Early Life Stage and Invertebrate Life Cycle for Both Freshwater and Marine Species
4. 74-7 Simulated or Actual Field Testing - Aquatic Organisms

Based on this, EEB presumes that phorate is hazardous to avian and aquatic species, and objects to the subject EUPs until the requested data are available for review.

Please call Dennis McLane (557-1993) if there are any further questions.
