1.0 Conclusions

1.1 In reply to Amchem's letter of 6/23/75, we can waive data requirements 4 and 5 of RD letter of 2/21/75 and those in our evaluation dated 12/5/74.

1.2 See 2.2 of introduction.

2.0 Introduction

2.1 See evaluation dated 12/5/74 for 264-EXP.

2.2 Amchem's letter of 6/23/75 states:

1. Area would ~~not~~ be used for agriculture, grazing and in most cases recreation. This use is reseed stripmine areas.
2. Currently only 1 treatment. Maybe 2 to insure complete vegetation establishment.
3. Rate would be 0.015oz/A of A naphthalenacetamide.

With these points in mind and data on hand, we can go along with the registration at a future date without additional data. The method of analyses would not detect 0.015oz/A in soil. Buildup in soil, if any, would not be expected since continued yearly application would not result.

This use would only represent minimal hazards to the environment when used as proposed.
