RSERB, RD

RE: Registration Status of Pesticide Uses with Pending
Emergency Exemption Requests

The purpose of this form is to identify the outstanding data requirements (in accordance with 40 CFR Part 158) necessary to secure the registration of this use. Other data gaps may be identified during the course of future petition or registration standard reviews.

After reviewing the attached emergency exemption, EE I.D. No. 85-CA-15, please complete the following using additional sheets if necessary. If a registration standard is available, RSERB/PM will identify data gaps to the extent possible for this particular use pattern. Reg Standard

_____ ... _____ ... _____ ... _____

TO: _____

RSERB, RD

Complete numbers 1, 2, and 3.

1. Data gaps in accordance with 40 CFR 164 Part 135 for the use described in the attached emergency exemption are: (RCB and TB please circle appropriate studies on attached sheet.)

2. Data listed in Number 1, above, are currently under review in HED and projected review completion dates are as follows:

Data listed in number 1, have not been received by Tif.

3. Data listed in Number 1, above, not required for previous uses. Minimum length of time to submit studies is:

Not applicable

Additional Comments:

TOXICOLOGICAL DATA REQUIREMENTS

Instructions: Please circle data gaps applicable to the use described in the cover sheet.

Oral LD50 - Rat

Chronic Feeding: Rodent
Non-Rodent

Dermal LD50 - Rabbit

Oncogenicity: Rat
Mouse

Inhalation LC50 - Rat

Primary Eye Irritation - Rabbit

Teratogenicity: Rat
(2 species) Mouse
Hamster
Rabbit

Primary Dermal Irritation - Rabbit

Dermal Sensitization - Guinea Pig

Reproduction (2 Generation): Rat or
Other

Neurotoxicity - Hen

90-Day Feeding: Rodent
Non-Rodent

Gene Mutation

21-Day Dermal - Rabbit

Chromosomal Aberration

90-Day Dermal

Other Mechanisms of Mutagenicity

90 Day Inhalation

General Metabolism - ~~Rat~~ Dog

90 Day Neurotoxicity - Hen, Mammal

Dermal Penetration

Domestic Animal Safety (Variable)

Additional Comments:

With reference to the memo of R. Sanabell dated April 11, 1985 to Jay Elbringer, the underpinning toxicology study has been resolved.
