File: pp# 2H 2662

We have examined the subject petition and related data proposing that Sections 121.1074 and 121.1075 of the food additive regulations be amended to provide for the safe use of combinations of piperonyl butoxide and pyrethrins in food processing areas and food storage areas and to establish appropriate tolerances for such use.

In our opinion the mixture of pyrethrins and piperonyl butoxide is useful as proposed in the petition. Such usage has been registered with this Division for many years.

Your petition is herewith returned.

P. C. Williams
