REQUESTED ACTION: Review additional data on purity of technical
tetramethrin relevant to guideline study 83-3(a)., MRID No. 114369.

CONCLUSION AND RECOMMENDATION:

1. The submitted information on the purity of test material and the attached review, indicates that the purity of the technical tetramethrin was 90-93% for the rat teratology study. The study is acceptable core-guideline data and supports re-registration.
