Recommendations: In a telephone conversation 6/15/78 with Mr. Gottlieb of Lonza Chemicals, Mr. Gottlieb stated the toxicity data used in support (method support 2.5) of Quat. No. 7 was available in the data on Lonza Disinfectant Cleaner 30-3 (EPA Reg. #6836-22), since both products

which would not impact on its toxicity. Therefore the only remaining toxicology study required to assess Quat. No. 7 which Mr. Gottlieb said would be furnished by Lonza, is the following: skin sensitization - guinea pigs on the formulated product.

The label signal word and precautionary statements are adequate for Danger label on eye irritation. Additional label precautionary statements will be addressed after review of the skin sensitization study.
