TYPE OF PRODUCT(S) : I,D,H,F,N,R,S Predacide

DATA ACCESSION NO(S). _____

PRODUCT MANAGER (NO.) W. Miller (16)

PRODUCT NAME(S) Compound 1080

COMPANY NAME USDA/APHIS

SUBMISSION PURPOSE Review protocol revision and quarterly progress report.

SHAUGHNESSY NO. CHEMICAL & FORMULATION(S) % A.I.

ECOLOGICAL EFFECTS BRANCH

CHEMICAL: Sodium Monofluoroacetate (Compound 1080)

100.0 Submission Purpose

In accordance with 40 CFR 172.8, as specified in Experimental Use Permit 56228-EUP-2, the United States Department of Agriculture- Animal and Plant Health Inspection Service (USDA-APHIS) has submitted a quarterly progress report relative to the use of single dose 1080 baits to control Arctic foxes on Kiska Island (See attached copy of report). In addition, the USDA-APHIS has requested an 8-month extension of the EUP because of a delay in the delivery of a new vessel assigned for management and research duties to the Alaska Maritime National Wildlife Refuge (AMNWR).

101.0 Discussion

The EEB has reviewed the quarterly progress report and has included it into the files. The EEB believes the data submitted to date indicate that the proposed use pattern is controlling Arctic foxes and resulting in benefits to the indigenous species of Kiska Island. The EEB also concludes that the request for extension of the permit should be granted.

102.0 Conclusions

The EEB concludes that the EUP is being conducted in accordance with those requirements described in the Pesticide Assessment Guidelines and additional restrictions as noted in the permit. The EEB believes that the USDA-APHIS should be granted their request for an extension of the permit.
