## Reviewer's Conclusions:

This study contains data derived from studies which are scientifically sound. With an LC50 less than 1 ppb , endosulfan is very highly toxic to striped bass. The study does not satisfy the guidelines requirement for a 96-hr LC50 on fish because of non-recommended test species, unknown % a.i., and incomplete reporting of results.

## Data Evaluation Record

- 1. Chemical: Endrin, Endosulfan, DDT, Dursban, Carbaryl, Abate, DDD,
  Heptachlor, Methoxychlor, Toxaphene, Aldrin, Lindane,
  Chlordane, Malathion, Parathion, Dieldrin, E.P.N.,
  Fenthion, Dibrom, and Methyl Parathion.
- Pormulation: Endrin, 99% a.i.; Endosulfan ? a.i.; DDT 77.2% a.i.;

  Duraban 99 + % a.i.; DDD 99% a.i.; Heptachlor 99 + %

  a.i.; Methoxychlor 89.5% a.i.; Toxaphene 100% a.i.;

  Aldrin 90% a.i.; Lindane 100% a.i.; Chlordane 60% a.i.;

  Malathion 95% a.i.; Parathion ? a.i.; Dieldrin 85%

  a.i.; E.P.N. 87.7% a.i.; Fenthion ? a.i.; Dibrom 90%

  a.i.; Methyl Parathion 80% a.i.; Carbaryl 98% a.i.;

  Abate 90% a.i.
- 3. Citation: Korn, Sid and Earnest, Russell (1974), "Acute Toxicity of Twenty Insecticides to Striped Bass, Morone saxatilis", Calif. Fish and Game, 60(3):128-131.
- 4. Reviewed By: Miachel Rexrode Fishery Biologist EEB/HED
- 5. <u>Date Reviewed</u>: 9/15/79
- 6. Test Type: Aquatic acute LC 96-hr. (Estuarine)
  - A. <u>Test Species</u>: Striped Bass <u>Morone</u> <u>saxatilis</u>
- 7. Reported Results:

Endrin, Endosulfan, DDT, and Dursban proved to be the most toxic to striped bass,  $\text{TL}_{50}$  <1 mg/l. Carbaryl and Abate were at the other end of the scale, proving to be relatively non-toxic with  $\text{TL}_{50}$  >1000 mg/l.

## 8. Reviewer's Conclusions:

This study contains data derived from studies which have been determined to be scientifically sound but do not satisfy the intent of the proposed guidelines.
