EPA Reg. No.: _____

Deferral to:

PHED: Yes, V1.01

1.0 INTRODUCTION

Ciba-Geigy, the registrant for atrazine, has submitted a report assessing the exposure of workers to the herbicide. The document, titled "Assessment of Worker Exposure for Atrazine in Response to the U.S. Environmental Protection Agency Issuance of the Triazine Herbicides Position Document 1 Initiation of Special Review" (MRID No. 435986-38) was submitted in response to the PD 1. The submission contains use information and a series of estimates derived from the Pesticide Handlers Exposure Database (PHED) Version 1.01.

2.0 CONCLUSIONS

The current submissions contain assessments conducted using PHED V1.01. PHED V1.01 has been replaced by a newer version, 1.1 and is considered to be obsolete. The registrant assessments have been updated and resubmitted (MRID Nos. 441521-07, 441521-06, DP Barcodes D232233 and D232231). The use information associated with these submissions has also been updated. Therefore, a separate review of D215525, D215523, and D215546 would not be of value. OREB will not evaluate these actions but will provide comments and assessments on the updated submissions only.
