Attached, please find the EFGWB review of:

Reg./File #(s): 080803-0

Common Names: Atrazine

Type of Product: Herbicide

Product Name: _____

Company Name: CIBA-GEIGY

Purpose: Review of FIFRA 6(a)(2) surface water monitoring data

Action Code: 405

EFGWB #(s): 92-1303

Total Review Time: 0.5 day

This review is of a summary of data (424432-01) on the concentrations of atrazine, atrazine degradates, simazine, and metolachlor in 11 samples collected in May 1992 from the Chesapeake Bay in Maryland. The data summary was submitted by CIBA-GEIGY in compliance with FIFRA 6(a)(2).

1. CHEMICAL:

Common Name: Atrazine

Chemical Name: 2-Chloro-4-ethylamino-6-isopropylamino-
1,3,5-triazine

Type of Product: Herbicide

Chemical Structure:

Physical/Chemical Properties

Molecular Weight: 354

Physical State : White crystalline solid

Aqueous Solubility: 70 mg/L @ 22°C

Vapor Pressure: 3.0×10^{-7} mm Hg

Log Octanol/Water Partition Coefficient 2.33 to 2.71

2. TEST MATERIALS:

Not applicable.

3. STUDY/ACTION TYPE:

Review of FIFRA 6(a)(2) surface water monitoring data.

4. STUDY IDENTIFICATION:

D181922/424432-01: Letter dated 8/10/92 from K. Stumpf of CIBA-
GEIGY to R. Taylor of RD/OPP.

5. REVIEWED BY:

Henry Nelson, Ph.D., Head *X/ Nelson*
Surface Water Section
Environmental Fate and Groundwater Branch/EFED

6. APPROVED BY:

Hank Jacoby, Chief
Environmental Fate and Groundwater Branch
Environmental Fate and Effects Division/OPP

7. CONCLUSIONS:

(1) Atrazine was detected (detection limit 0.1 ug/L) in 7 of the 11 samples collected. In 6 of those samples, concentrations ranged from 0.1 to 0.48 ug/L. One sample had a much higher atrazine concentration of 8.5 ug/L.

(2) Between one and 3 chloro-atrazine degradates (desethyl-atrazine, desisopropyl-atrazine, and desalkyl-atrazine) were detected in 10 of the 11 samples collected at concentrations ranging from 0.10 to 4.0 ug/L.

(3) Simazine was detected in 9 of the 11 samples. In 8 of those samples, concentrations ranged from 0.10 to 2.6 ug/L. One sample had a much higher simazine concentration of 5.2 ug/L.

(4) Metolachlor was detected in 7 of the 11 samples collected at concentrations ranging from 0.12 to 3.6 ug/L.

5) In a previous submission (see EFGWB #92-0951) of data on samples collected in February/March 1992 (pre-application) from the Chesapeake Bay, CIBA-GEIGY reported that atrazine was detected (detection limit 0.1 ug/L) in 9 of the 23 samples at concentrations ranging from 0.15 to 0.28 ug/L.

8. RECOMMENDATIONS:

It is unclear why this data were submitted under 6(a)(2). Chesapeake Bay is a saline estuary unfit to supply drinking water. In addition, except for atrazine in one sample and simazine in one sample, the reported concentrations are well below drinking water MCLs or lifetime drinking water HAs. Are the reported concentrations of potential concern from an aquatic toxicity standpoint? It should be determined why CIBA-GEIGY considers this data to represent potential adverse effects.

9. BACKGROUND:

This review is of a summary of data (423151-01) on the concentrations of atrazine, atrazine degradates, simazine, and metolachlor in 11 samples collected in May 1992 from the Chesapeake Bay in Maryland. The data summary was submitted by CIBA-GEIGY in compliance with FIFRA 6(a)(2).

10. DISCUSSION:
See conclusions.

11. COMPLETION OF ONE-LINER
Not applicable

12. CBI INDEX:
Not applicable.
