Attn: Ms. JoAnne Miller, PM 23

Dear Ms. Miller:

SUBJECT: FINDING OF SIMAZINE IN GROUNDWATER LAKE PLACID, FLORIDA

CIBA-GEIGY was recently informed by the state of Florida of the contamination of a private well near Lake Placid where simazine was detected at 6.1 ppb. CIBA-GEIGY split samples with the state and that analysis showed levels <0.85 ppb of simazine. Since the original report, the state has also confirmed that levels are actually below 1.0 ppb. CIBA-GEIGY is not planning to do any additional work in connection with this site.

This report is made in accordance with FIFRA Section 6(a)(2).

Should the Agency require additional followup, contact should be made with:

Mr. David Vogel
Administrator
Pesticide and Data Review Section
Florida Department of Environmental Regulation
Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, FL 32399-2400

Sincerely,

Karen S. Stumpf

7. CONCLUSIONS: The registrant notified EPA of simazine detections of 6.1 ppb in a private well near Lake Placid, Florida. The simazine MCL is 4 ppb. The Florida Department of Environmental Regulation (FDER) indicated that carbon filtration was used to reduce residue levels in private wells located near orange groves. The reported level of <1 ppb was obtained following filtration, according to FDER. FDER has agreed to send periodic reports of residue levels from monitoring studies. The information will be included in EPA's Pesticides in Ground-Water Database.

8. <u>RECOMMENDATIONS:</u> The registrant should continue to report 6(a) 2 data and information to the Agency.

9. BACKGROUND/DISCUSSIONS: The data in this action were submitted under Section 6(a)2 of FIFRA. The report of detections contained results of simazine in samples of well water. The level reported for simazine was above the maximum contaminant level (MCL=4 ppb) which may result in unreasonable adverse effects.

The FDER reported that there have been numerous cases of pesticides in private (drinking water) wells near orange groves and that filtration has been successfully used to lower residue levels.
