001189

DATE: July 23, 1981
SUBJECT: Orthocide 15 Dust
EPA Reg. No. 239-788

FROM: Sherell A. Sterling
FHB/TSS

Handwritten: 7-25-81 E 7/31/81

TO: Henry Jacoby
Product Manager (21)

Registrant: Chevron Chemical Company
Ortho Division
940 Hensley Street
Richmond, CA 94801

Active Ingredient:
Captan 14.2%
Related derivatives 0.8%
Inert Ingredients 85.0%

Background: This product is currently registered with the signal word CAUTION. The registrant submitted an Eye Irritation study to support a change from CAUTION to DANGER. This study was conducted by Environmental Health and Toxicology of Standard Oil Company of California of Richmond, California. The method of support is "cite-all."

Recommendations:

1. The Eye Irritation study is considered adequate and acceptable for conditional registration purposes. Please note for further studies that 100 mg of solid substances must be placed in the eye,
2. Based on the Eye Irritation data, the appropriate signal word for this product is DANGER.

Labeling Recommendations:

1. The "Hazards to Humans and Domestic Animals" statement must be revised as follows or similarly:

DANGER. Corrosive. Causes irreversible eye damage. Harmful if swallowed. May cause allergic skin reactions. Harmful if swallowed or inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing dust. Wear goggles when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

MEMORANDUM

Date. July 8, 1981

Subject: EPA File Symbol: 8590-LAG LIQUID FRUIT TREE SPRAY
Caswell # 159, 535, 550, 160, 907

From: Cheryl A. Peterson (R)
IRB/TSS

To: William Miller
Product Manager (16)

Applicant: Agway Inc.
Chemical Division
Box 4933
Syracuse, NY 13221

Active Ingredients:

Captan (N-((trichloromethyl)thio)-4-cyclo-hexene-1,2-dicarboximide).....	11.35%
related compounds.....	0.65%
Malathion (o,o-dimethyl dithiophosphate of diethyl mercaptosuccinate).....	6.00%
Methoxychlor, technical.....	12.00%
Carbaryl (1-naphthyl N-methylcarbamate).....	3.00%
Xylene Range Aromatic Solvent.....	59.07%

Inert Ingredients: 6.00%

Background:

This product is intended for outdoor, homeowner use on fruit trees against insects, fungi, aphids, mites and scales. The company has submitted an application for conditional registration of a new pesticide product. The "cite-all" method of support has been indicated, and no safety data has been submitted.

Comments & Recommendations:

1. IRB/TSS is not aware of any products currently registered with the Agency which contain the combination of all active ingredients contained in this particular product.

2. The referenced toxicity data on file with the Agency indicated by the use of the "cite-all" method of support should be specifically cited, or previously registered products with the combination of captan, malathion, methoxychlor and carbaryl together should be specified.
3. If such data cannot be referenced or similar products have not been registered, this information should be specified; and acute oral, acute dermal, primary eye irritation and primary skin irritation data should be submitted or cited from the open literature.
4. IRB/TSS defers recommendation for conditional registration of the above product pending receipt of additional information on toxicity data support for the product.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS (& DOMESTIC ANIMALS)

CAUTION: Harmful if swallowed or inhaled. Avoid breathing spray mist or contact with skin, eyes or clothing. May be absorbed through skin. Do not use on household pets or humans. Wash hands and contaminated clothing after use. Do not smoke while applying. Store out of reach of children.

Remove residue on edible fruit by wiping or washing before canning or eating. Avoid contamination of foodstuffs, feed or feeding troughs and water receptacles or pets or animals, outdoor fish ponds, streams and water supplies.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not reuse container. Bury in a safe place.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

AGWAY LIQUID FRUIT TREE SPRAY

DATE: 2/4/81

EASY TO USE: Mixes with water instantly; no plugged nozzles; no messy powders to handle, measure or mix; no pre-mixing or straining necessary. Designed especially for home orchards to protect apples, cherries, grapes, peaches, pears, plums and prunes from the ravages of insects and diseases listed on spray chart below.

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SHAKE PRODUCT THOROUGHLY BEFORE USING. Contains micronic particles which settle upon standing and require reblending by agitation. Choose a cool, calm period, preferably early morning or evening, when trees will not be subjected to hot direct rays of the sun. Do not apply if rain is expected before leaf surfaces dry. It is easier to prevent disease and scale damage than to cure same, therefore a preventative 10-14 day spray schedule is recommended. When insects are present, use maximum dilution. When active disease spores are present (warm, humid days) shorten spray intervals to 5-7 days at maximum dilution.

Apply spray to leaves, fruit branches, trunk and base of tree until lightly dripping. Shake sprayer occasionally or agitate to keep spray particles in suspension during application. Follow spray schedule given below in tablespoons per gallon of water. For larger quantities, use 1 gallon per 100 gallons of water. Observe caution statement and cautions for fruit to be treated.

STORAGE & DISPOSAL (12 point)

Do not reuse empty container. Wrap container and put in trash collection.

NOTE: This pesticide is to be sold ONLY in this original unbroken package.

DISCLAIMER: Buyer assumes all risks of use, storage or handling not in strict accordance with directions given herewith.
