OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

SUBJECT: Captan, EPA registration No. 476-2099. Review of miscellaneous data. (Revised pages and historical rat control data for IRDC rat carcinogenicity study). Submitted by Stauffer Chemical Co. June 15th 1983. EPA accession No. 250667 and 250668.

TOX. Chem. No. 159

TO: Henry Jacoby, "PM 21"
Registration Division (TS-767)

THRU: Edwin R. Budd, Section Head
Section II, Toxicology Branch
Hazard Evaluation Division (TS-769)

*11/3/84
16/10/83*

Thirty two pages of the IRDC rat carcinogenicity study were marked "revised" and no explanation was included. At our request, the registrant has forwarded the original pages. I have examined them and have found no changes that would influence our previously written review of this study.

A few totals were changed in the registrant's write-up of the study, however we do not use these totals but work from the original tables. Other pages were revised to make room for the previous minor changes. The revised pages we were primarily concerned with were the microscopic neoplastic incidence tables. It turns out that the only changes on these pages was in the title which was changed from "Microscopic Neoplastic Incidence Table" to "Total Microscopic Neoplastic Incidence Table".

The second part of the submission, the historical rat control tumor data, has been included with the information to be analysed by our statistical section.
