

10-2-86

MEMORANDUM

SUBJECT: Folpet Special Review

TO: Team Members (See Below)

FROM: Carol (Langley) Monroe

At the September 26, 1986 meeting on folpet, the team discussed the possibility of addressing folpet exposure and risk for applicators who incorporate folpet into end products (such as addition to paint) and for people who use the end-product (such as application of the paint) which has no pesticidal claim ~~on~~^{for} the product itself.

The Captan PD-2/3 did address exposure and risks from these 2 types of use, but the Registration Standard did not.

The Folpet team will meet to address this issue on Monday, October 6, at 2 P.M. in Room 1006K in the Special Review Branch.
