NOV 7 - 1968

To: James B. Lamb
Petitions Control Branch
SC-13
Food and Drug Administration

From: Harry W. Hays, Director
Pesticides Regulation Division
ARS:USDA

Subject: Pesticide Petition No. 9F0743 - Daconil

Reference: Your memo dated October 14, 1968

In our opinion, a warning against rotation with other crops is not necessary. The study which showed a half life of 220 days in clay was carried out in the laboratory in sealed glass containers. Data from field application show that 67% of the pesticide applied had disappeared after 78 days.
