NOTES

Calculations of the above numbers may not appear to agree because they are displayed as rounded.

NO OBS = No Observations. This site is covered by EPA sources, but little or no usage is observed, or may be included with all other pesticides. For these sites a likely maximum percent treated is included, above which the actual usage is unlikely to be.

NO DATA = This site is NOT covered by EPA data sources.
= insufficient data to determine an amount for this field.

Usage data primarily covers 1990 - 1994 for most sites and as early as 1987 for some sites. Likely averages are based on weighted averages of data with most recent years and more reliable data weighted more. Early years are weighted very low. Likely maximums are an amount above which the actual usage is unlikely to be. Application rates are calculated from likely averages or are based on typical rather than maximum rates.

* Other/Crop Groups

Citrus. Other includes kumquats, limes, tangelos, and tangerines.
Nut Trees. Other includes chestnuts, filberts, hazelnuts, hickory nuts, macadamia nuts, pistachios, lychie nuts, and palm.
Pome-Like Fruit. Other includes figs, kiwifruit, persimmons, pomegranates, carambolas, and papaya.
Stone-Like Fruit. Other includes apricots, avocados, dates, nectarines, olives, coconuts, mangoes, and feijoa.
