SECOND PERIODIC REPORT

1) We note ⁱⁿ your letter of April 24, 1974 under item

1(c) that "gross observations will be made at all sites of application to determine if there is an ~~obvious~~ obvious decrease in bird activity ^{or} if mortality occurs ---". Can we expect more reports similar to Robert Fisher's?

We have carefully reviewed ^{the} bird studies done by Dr. Lamb and find them acceptable. At this point, we do not feel that the previously discussed field monitoring in California ~~is~~ will be necessary.

RL 1/2/75 JUA
