

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

SUBJECT: PP #5G1605/5H5081 - Orthene in grapes, raisins,
waste and grape pomace; amendment of 5/26/76

DATE: JUN 10 1976

FROM: Toxicology Branch

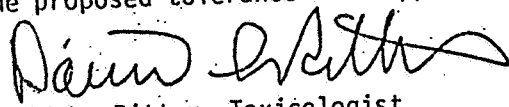

TO: D. Stubbs, SRS/RD
CHEM Branch

Related petitions: 3F1375

Petitioner proposes amending section F to reflect higher residues
of orthene in grape pomace, to 15 ppm instead of the former 10 ppm.

Recommendation:

Since grape pomace is not a human food item TB has no objection to
the proposed tolerance of 15 ppm in this rac.
