Thank you for Secs. A. and B.

However, the "confidential statement of formulation" which accompanies this EUP is still needed in order to process this request. And copies of acute TOX studies, Nos. 1-6, inclusive, which are listed on bottom half of first page under Section C (on MON-2139), are still needed. (I understand that they are not in TS, but I do not have them, nor does Mr. Hawkins have them, he tells me.)

It appears that we have located the requested tox studies in PP 1536. We still require an original of the confidential statement of formulation
