MEMORANDUM

JUN 30 1992

SUBJECT: Status of Protocol Review, Bolero

FROM: Douglas J. Urban, Acting Chief  
Ecological Effects Branch  
Environmental Fate and Effects Division H7507C

*Douglas J. Urban*  
6/30/92

TO: Linda Deluise PM  
Reregistration Branch  
Special Review and Reregistration Division H7508W

The EEB is currently working on two actions, D176910 and D178455. Both pertain to review of a protocol for residue monitoring for Bolero. D176910 is a protocol review and D178455 requests a meeting with the registrant to discuss EEB's evaluation of the protocol. The reviewer completed the draft evaluation June 2, 1992. However, in addition to the reviewers evaluation, a Branch peer review team also looks at all field study and monitoring protocols to ensure consistency between such studies. Due to workload and other priorities, the team will be unable to evaluate the protocol before the proposed July 7, 1992 meeting date. Therefore, we are requesting that the meeting be postponed until the team has a chance to look at the protocol and the reviewer has incorporated any of the teams comments.

Further, we are also asking for an extension of one month beyond the current deadline of July 15, 1992 for the protocol review. Thank you and if you have questions, please call Dan Rieder, 305-5314.
