## INTRODUCTION

- 1.1 The registrant has submitted data to satisfy data gaps in the metolachlor registration standard.

## 2. RECOMMENDATIONS

- 2.1 This submission is not relevant to the Registrtrtion Support Section of EFB. We suggest that this submission be routed to the Registration Standards Section of EFB which is Section #3 and is currently headed by Hudson Boyd (Acting). Also , when routing this submission to section #3/EFB, it is not to go through Marvin Hawkins at all, but probably should go through SPRD.
