MEMORANDUM

SUBJECT: Submission of Mesocosm Progress Report for Asana.

Human J. Cook for
FROM: James W. Akerman, Chief
Ecological Effects Branch
Environmental Fate and Effects Division (TS-769C)

TO: George LaRocca (PM-15)
Registration Division (TS-767C)

A progress report on the ongoing Asana aquatic mesocosm study was submitted 28 November 1988. The report gave no specifics, only that biological samples are being processed with no major problems encountered at this point. A final report of the acclimation phase of the study should be submitted shortly. Fish have yet to be sampled, but coefficients of variation for other biological parameters range from 20-80%. The study consultants (Wildlife International, Ltd.) assert that ecosystem responses are detectable.
